ALN-V (Photoelectric Smoke Sensor)

Hochiki Corporation greatly appreciated your continued support of our product. We hope to continue the relationship with many years to come.

We are pleased to announce the release of the **ALN-V photoelectric smoke sensor**. This release will replace the **ALK-V Photoelectric Smoke Sensor** which will be discontinued effective 10/31/2014.

The **ALN-V** is fully interchangeable with the **ALK-V** and boasts a new look. The **ALN-V is RoHS compliant** and thus free of several harmful substances. As a result of the RoHS compliance, the **ALN-V is an environment-friendly option for many applications.**

Also, please be advised that UL 9th Edition FireNET and FireNET Plus panels will need to have the latest firmware (coming soon) installed before switching to the use of the **ALN-V** smoke sensor. A UL 9th Edition FireNET panel (once updated with the new firmware) will recognize the ALN-V as an ALG-V sensor and function as an ALG-V sensor. As a result, the ALN-V sensor's additional features will not be exhibited in its use. A FireNET Plus panel, on the other hand, will recognize the ALN-V sensor and function with all of its capabilities (once updated with the new firmware). **UL 8th Edition FireNET will not support the ALN-V sensor.**

Yours faithfully
