

## Description

The P-9911(S) handsfree speaker fire telephone communication point is compatible with the GST- FT series of fire telephone panels, for emergency communication over a dedicated hard wired system normally located with the fire command centre.

## Operation

### Receive Call

Press the button to talk with the control panel when the handsfree speaker is ringing. Press the button again to stop.

### Call Control Center

Press the call button, the fire telephone panel in the control room will get ring, and the relevant zone calling indication will illuminate. Once the control centre accepts your call, you are connected for direct voice communications.

## Installation

The handsfree speaker is wall mount type, available for flush mount. The unit should be mounted in a suitable and dry location at about 1.5m from finished floor level. Common installation positioning is in the landing levels of all core stairwells and escape routes, although the exact positioning is the responsibility of the project designer. Each zone is connected to the command centre using a fire rated 2-core 1.0mm<sup>2</sup> cable. Please test it after installation.

## Specification

Frequency Range	300Hz to 3400Hz
Ring Sound	≥70dB(A)
Dimension	172mmX106mmX70mm
Operating Environment	Temperature: -10 °C to 50 °C Humidity≤95%, non condensing

## Limited Warranty

**GST** warrants that the product will be free from defects in design, materials and workmanship during the warranty period. This warranty shall not apply to any product that is found to have been improperly installed or used in any way not in accordance with the instructions supplied with the product. Anybody, including the agents, distributors or employees, is not in the position to amend the contents of this warranty. Please contact your local distributor for products not covered by this warranty.

This document is subject to change without notice. Please contact GST for more information or questions.
